

NEW PROPOSALS MADE

For the Settlement of Dispute Between Greece and Turkey.

VICTORY FOR GERMAN DIPLOMACY.

An International Committee Representing Six Powers Will Control Greek Revenues.

London, September 7.—A dispatch last night from London to the Associated Press and the correspondent of the Times at Constantinople telegraphed that owing to a note from Count Marquess, the Russian minister for foreign affairs, indicating that Great Britain was responsible for the terrible evils from which Greece and Turkey are suffering through the delay in the conclusion of peace between the two countries, the Marquis of Salisbury submitted fresh proposals for the settlement of the permanent peace between Turkey and Greece, namely, the establishment of an international commission, representing the six powers under whose control Greece shall put her revenues, guaranteeing the payment to the holders of old bonds and to the holders of the bonds of the indemnity fund, this step to be followed by the prompt evacuation of Thessaly by the Turkish troops.

A dispatch to the Associated Press last night from Vienna and the Political correspondent announced that Greece had abandoned her opposition to the demands of Germany regarding the control of Greek finances and that therefore there was a possibility that the Marquis of Salisbury's latest proposal would lead to a settlement of the matter in dispute between Greece and Turkey.

London, September 7.—The Marquis of Salisbury's latest proposal for the settlement of the terms of peace between Turkey and Greece is generally regarded as a victory for German diplomacy, and much better feeling is displayed in England over the British premier's attitude. A final proposal was that Germany had been influencing the Turks, namely, the control of the Greek revenue in the interest of all the creditors of Greece as well as for the safety of the man to Greece for the purpose of paying the indemnity to Turkey.

Constantinople, September 7.—The Marquis of Salisbury's proposal for the conclusion of an international commission representing the six powers to assume control of the revenues with which Greece will guarantee payment of interest for the holders of old bonds as well as payment of the indemnity sum has been accepted by the powers.

Constantinople, September 7.—The only remaining question is the date for the payment of the indemnity. The powers desire to insert these dates in the treaty of peace, but the British ambassador, Sir Philip Currie, suggests that they leave the date to be determined upon by the international commission. The ambassadors expect that all the details of the treaty of peace will be settled on Thursday next.

Discussion is Postponed.
Constantinople, September 7.—The ambassadors have decided to defer the discussion until peace is signed, of the Turkish government's note concerning the appointment of an Ottoman governor of Crete and its intention to retain the Turkish troops in Crete.

Turkish Officers.
Cane, Island of Crete, September 7.—The Turkish garrison has been placed under the command of officers of European governments, the powers paying the expenses and receiving their due cut of the customs receipts.

THREE CASES AT BILOXI.

(Continued from First Page.)

Superintendent Marshall of the Louisville and Nashville railroad with reference to the discontinuing of mail to and from the infected points. Complaint had been made that Ocean Springs and Biloxi were being diverted off main facilities. It is understood that after the conference that arrangements would be made to take mail from the stations at Ocean Springs and Biloxi by means of pouches. All mail in these points is being delivered without a hitch and is being received from and delivered at all non-infected points between this city and Biloxi.

The board of health decided during the day to maintain a complete inspection camp at Biloxi, through which entrance is made to the city. A physician has been put in charge and it has been arranged to make passengers and baggage go through the same operation and inspection as obtain at the quarantine station at the mouth of the Mississippi. No one would be allowed to come through as to whom health there exists the remotest doubt. At the same time the board decided to inspect to all the gulf coast points to make a full and thorough examination of their health and sanitary conditions. Dr. G. H. who made his first stop at Bay St. Louis and who visited every suspicious case of fever there, reported tonight that there was no semblance of yellow jack in that town, but that, on the contrary, Bay St. Louis was thoroughly healthy.

A careful inquiry was made among local hotel offices this afternoon to learn whether or not there was any threatened danger from the city. All but one of the hotels advised that the power business was very normal. The Northern Hotel and those who were carrying a considerable amount of merchandise between the port and the interior, increased the increase to meet the increased traffic. The Northern Hotel was the only hotel that was open, however, that night.

At present the mail has been re-

ported at Ocean Springs. It occurred this afternoon and the patient was Laura Bach, a woman who went from New Orleans to Ocean Springs about a fortnight ago. Dr. Shadley, a local physician at Ocean Springs, gave the diagnosis as those of yellow fever. The girl was 17 years of age and was ill six days. No new cases had been reported during the afternoon. Ocean Springs has now been absolutely cut off from the outside world and the only means of reaching the outer sea by wire or mail. The most popular there is well nigh

lost sight of. A number of families tried to run the quarantine line the river, but they were discovered and driven back. A complete engine of public opinion has surrounded the town and every avenue of approach or exit is covered by an efficient guard. Of course, if this rigid quarantine is maintained for any length of time serious suffering is certain to result. It was said this afternoon that there was only one of us in the news and we were not more. We are absolutely isolated.

The disease will not spread in the inside mouth of Illinois except on the sea route. It has been known to reach us for many hours and there have been few hours for us to expose our selfs to the sun or to swim. It is not an certainty that medical supplies will not soon be exhausted. But it is anticipated that in the course of a day or even mean will be found whereby the Springs may be supplied with an abundance of medicine and other articles of comfort.

In the Associated Press telegraph last night it was strongly indicated that the yellow fever at Ocean Springs had been communicated from Ship Island, where the disease was at its height. The disease is now at its height. The agent in charge of the Mississippi house of health informed the Marquis of Salisbury's proposal for the settlement of the permanent peace between Turkey and Greece, namely, the establishment of an international commission, representing the six powers under whose control Greece shall put her revenues, guaranteeing the payment to the holders of old bonds and to the holders of the bonds of the indemnity fund, this step to be followed by the prompt evacuation of Thessaly by the Turkish troops.

BOARD OF HEALTH STATEMENT.

New Orleans, September 7.—The following official statement was sent to the Associated Press tonight:

New Orleans, September 7, 1897.—The board of health has withdrawn quarantine restrictions against all points on the gulf coast upon certificates from its own health offices of non-existence of suspicious fever excepting at Ocean Springs and Biloxi.

New Orleans has but one case imported from Ocean Springs. The patient died and proper precautions have been taken against any infection. Careful inspection today in this city showed the existence of no suspicious cases.

S. R. Oliphant,
President State Board of Health of Louisiana.

W. C. Flower,
Major City of New Orleans.

stopped at many points and at Montgomery and several other points along the way passengers were not permitted to leave the train. Atlanta will not quarantine against the fever from the Mississippi district.

Notches Has Quarantine.
Mobile, Miss., September 7.—This city today declared a quarantine against all points along the Mississippi sound on account of the yellow fever. Mobile has been rigidly quarantined and residents of that city are practically safe. In the second place, the fever is much more controllable now than it was a few years ago. Modern methods of fumigation render it much less harmful. But prevention is better than quarantine.

The disease has been declared a community and not as a general marsh. It is exceedingly unpredictable in the present day with the improved methods of fighting the disease.

Mobile on Guard.
Mobile, Ala., September 7.—Heavy precautions have been taken today to guard against the introduction of yellow fever. A year ago last October I made report to the Mississippi board of health saying that in less than five years Mississippi would have yellow fever. Now Ship Island harbor should either be deemed to guarantee a half dozen who got to before quarantine arrangements were completed have been sent out of the city to the destination camp. Isolated districts miles away on the Louisville and Nashville railroad at this point also are detached all persons who came from distant points or from New Orleans. They must remain here days in quarantine. There are several places in which the fever has been established as a presumptive disease.

No public cars are allowed to come into Mobile.

Precautions in Florida.

Jacksonville, Fla., September 7.—The State board of health has issued a proclamation forbidding the introduction of yellow fever from the Mississippi sound into the state.

Mobile, Ala., September 7.—Heavy precautions have been taken today to guard against the introduction of yellow fever. A year ago last October I made report to the Mississippi board of health saying that in less than five years Mississippi would have yellow fever. Now Ship Island harbor should either be deemed to guarantee a half dozen who got to before quarantine arrangements were completed have been sent out of the city to the destination camp. Isolated districts miles away on the Louisville and Nashville railroad at this point also are detached all persons who came from distant points or from New Orleans. They must remain here days in quarantine. There are several places in which the fever has been established as a presumptive disease.

No public cars are allowed to come into Mobile.

Detention Camp in Georgia.

Washington, September 7.—The treasury department has purchased 200 tents from the war department for use in the permanent yellow fever detention camp which has been established at Marietta, Ga. There are no fever patients there, but the camp has now been established as a presumptive disease.

Detailed at Edwards.

Jackson, Miss., September 7.—A telephone message from Dr. McCallum at Edwards, Miss., emphatically denies the existence of yellow fever in or near the town. Dr. McCallum says that Mrs. S. C. Chapman, who came to town yesterday, was not exposed to the disease.

Precautions Taken.

DR. SWEARINGEN ORDERED CAMPS OF DETENTION.

Dr. Laredo Sent to Logansport.
Dr. Blant to Waukon-The Effect at Galveston.

THREE CASES AT BILOXI.

The News Did Not Create Any Panic, However.

Biloxi, Miss., September 7.—Dr. Hamilton, representative of the board of health, called a special meeting of the board members of the city tonight at 8 o'clock for the consideration of important business. The board has just adjourned at 11:30 p.m. and Dr. Hamilton furnished the information that there are now three well defined cases of yellow fever in Biloxi, all located at what is known as Point Cadet. All cases are under strict guard and quarantine will be complete. There is no apprehension here but that the fever will spread rapidly around the place and cause alarm and consternation throughout the city.

Three at Montgomery.

Montgomery, Ala., September 7.—The government has called a meeting of the State board of health for tomorrow to consider the yellow fever and smallpox situation. Ten prominent citizens were stopped on the Louisville and Nashville train this morning outside of the city and forced to pass through without stopping here. Three of the men arrived from Ocean Springs and were sick and orders from the public health office require all persons from the infected district to be moved out of the city at once.

SPREAD IMPOSSIBLE.

Lateness of the Season Will Prevent Epidemic in New Orleans.

New Orleans, September 7.—There has been no epidemic of yellow fever in New Orleans since 1859 and with the present quarantine system there is no more danger of an epidemic here than in Boston, where the cases were reported. The government regulations relative to the prevention of the spread of epidemic diseases from one State to another. The regulations provide that no person shall be allowed to leave a State or territory where there is a danger of yellow fever unless he has been examined and certified as free from the disease and if a certificate is issued to him he may travel.

The record shows 1859, as follows: 1859-60, no cases; 1860-61, one case, but doubtful as to date; 1862-63, 1864-65, 1866-67, no cases; 1868, 1 case; 1869-70, 1 case imported from Liverpool, England. No further cases since 1870, except a recent case imported from Ocean Springs. The lateness of the season makes any spread impossible.

Dr. Guitars Is Route.

Shreveport, La., September 7.—The board of health tonight announced that several suspicious cases had been investigated during the day and had been found to be nothing like yellow fever. The Orleans Parish Medical society tonight also gave assurance to the same effect.

The board of health also stated that inspectors had been placed in all the resort towns along the coast and upon the report of the latter the quarantine against Pass Christian and Bay St. Louis was withdrawn.

Three suspicious cases of fever were reported at Biloxi tonight and the quarantine against that point and Ocean Springs will be maintained. Both places are strictly guarded by the Mississippi authorities. The trains do not stop at any quarantine town, the mails being taken from cranes.

Trains Do Not Stop.

Mail from Ocean Springs and Biloxi Taken from Cranes.

New Orleans, September 7.—The board of health tonight announced that several suspicious cases had been investigated during the day and had been found to be nothing like yellow fever. The Orleans Parish Medical society tonight also gave assurance to the same effect.

The board of health also stated that inspectors had been placed in all the resort towns along the coast and upon the report of the latter the quarantine against Pass Christian and Bay St. Louis was withdrawn.

Three suspicious cases of fever were reported at Biloxi tonight and the quarantine against that point and Ocean Springs will be maintained. Both places are strictly guarded by the Mississippi authorities. The trains do not stop at any quarantine town, the mails being taken from cranes.

Shreveport Locks Her Doors.

Shreveport, La., September 7.—The board of health, board of trade and city council have held meetings today and adopted quarantine against New Orleans, Ocean Springs, Scranton, Edwards and all infected points. Competent physicians as inspectors will rigidly examine passengers on the Texas and Pacific, Vicksburg, Shreveport and Pacific, Kansas City, Missouri and all steamboats on Red River from New Orleans to Shreveport.

Effect at Galveston.

Galveston, Texas, September 7.—The yellow fever scare in New Orleans has had its effect upon Galveston shipping. Several boats, which are now in Galveston and had intended loading in New Orleans will not go to that port. All of these were bound for foreign ports. They will complete their cargoes here and sail direct for Europe.

Shreveport men discussing the situation today think Galveston will be benefited, but will be only temporary. Foreign owners of vessels and local ship brokers do not want to take chances at an infected port even though freight is waiting.
